

VOLVO S60

DESIGNED TO CATCH THE LIGHT BRILLIANTLY S60 REFLECTS A PROMISE.

The S60 – like every Volvo – is a car that makes you feel special. A car that enhances your life through the enjoyment, comfort and beauty it provides. At the heart of it all is a great driving experience. An experience that starts with the standard Dynamic Chassis, created to give you a responsive, in-command feeling behind the wheel. It makes the S60 a car that you really enjoy spending time in. On the type of roads you drive home on just for the enjoyment of driving, the S60 is your perfect companion.

A range of Drive-E powertrains give you responsive performance as well as low fuel consumption and emissions. By using lightweight construction, low-friction technology and advanced transmissions they get the most out of every drop of fuel. Inside, the S60 is a haven of calm and serenity. Our seats have been famous for their comfort ever since we

took the unprecedented step of consulting ergonomic experts to help us develop them, and the current generation are the latest example of this revolutionary approach. Supportive and comfortable, you will arrive fresh and relaxed after even the longest journey.

For the S60 it includes high quality displays and easy-to-use controls that make life easier, as well as the option of high-end audio systems and internet connectivity that keeps you in touch with your digital world on the move. Inside and out, the S60 embodies the best in Scandinavian design. You see it in the elegant and uncluttered interior, with its alluring blend of modern materials and traditional craftsmanship; in the confident presence the S60 has on the road. From its bold, assertive front grille to its integrated tail pipes at the rear, the S60 is a car that has the power to make you feel good every day.

DRIVER-FOCUSED DESIGN. ROAD-FOCUSED DRIVER. ALL-SYSTEMS GO.

We've designed the cockpit around you, the driver. Sit in the driver's seat and the dashboard, which is gently angled towards you, puts you in complete command. Inspired by high-performance motorbikes, we came up with the idea of a single round instrument flanked by two smaller dials. Then, we carefully sculpted the three-spoke steering wheel with the aim of giving you a clear sense of connection between your car and the road. Where you sit is equally important. Volvo Cars takes pride in designing seats that not only offer great comfort but also outstanding support, so that at the end of every journey you make you will feel as calm and refreshed as when you started. Our sport seats look great and,

true to our commitment to ergonomic design, side support all the way from your thighs to your shoulders ensures that you keep firmly in position, even when you're cornering fast. Of course, we're committed to a clean environment inside your car as well. As part of CleanZone, all interior materials in your Volvo are hypo-allergenic and do not emit harmful gases. CleanZone also includes a highly effective dust and pollen filter. And our Interior Air Quality System uses an active carbon filter to reduce harmful gases and particles, enabling that you and your passengers breathe easy – even in polluted cities.

INTELLISAFE

*Intuitive safety by Volvo Cars.
For you, and for those around you.*

At Volvo Cars, safety is an intrinsic part of our DNA. We've invented some of the world's most pioneering life-saving technologies – such as the three-point safety belt that's been acknowledged one of the most important innovations of mankind. But we aim higher. Our vision is that by 2020 nobody should be killed or seriously injured in a new Volvo. IntelliSafe is our approach for a more harmonious relationship between cars and people. To achieve this, we have infused your Volvo with smart, intuitive innovations for a safer drive. And the IntelliSafe technologies help protect not only the people inside your car – we also consider

people on the outside, for example with technology that helps you to detect pedestrians and cyclists. When you drive at speeds up to 31 mph, our City Safety collision avoidance technology looks ahead of you and brakes automatically if you're about to run into a vehicle in front. To give you more support at higher speeds, our Collision Warning with Auto Brake and Pedestrian and Cyclist Detection alerts you if you're too close to a vehicle and a collision is imminent – day or night. And if necessary, your car brakes automatically to help you avoid or mitigate a collision.

City Safety

Blind Spot

Park Assist

City Safety is designed to prevent you from colliding with the car in front if it stops, or slows suddenly. This advanced IntelliSafe system will automatically brake to avoid a collision and works at speeds of up to 31 mph – an accident can be avoided at a speed difference of up to 9 mph to the vehicle in front.

Because we also care about other road users, our pedestrian and cyclist detection with full auto brake watches out for people walking in your path or cycling, in the same direction as your car and applies the brakes if you're unable to react in time.

Our BLIS™ system uses radar sensor technology to alert you to vehicles that are close to or in your blind spots in your adjacent lane. This way, you're far less likely to change lanes when it isn't safe. When you're reversing out of tight parking spaces, our Cross Traffic Alert function watches out for vehicles you can't see.

SPECIFICATION VOLVO S60

Engine: 1969CC 4Cylinder	T5 Petrol	T6 Petrol
Rated Output (kw/hp/rpm)	180/245/5500	225/306/5700
